Exercise #6
February 22

Sebesta Questions

Due: Posted to Moodle by Tuesday Feb 27 by 6 pm
No late submissions.

Specifications

1. Work in groups of 2 or 3 in class ($N = 20 - \text{flu}$).
2. Discuss the problems specified.
3. Know terminology and concepts before discussing the questions. Do not assume you know the topic from just a word or two (example: typeless language).
4. Questions (Sebesta “problem sets” not “Review”).
 - a. chapter 4: 5, 6, 7
 - b. chapter 5: 1, 3, 7, 9
5. You may want one person to take notes during the discussions and one person (not necessarily the same person) to produce the final submission. All group members should approve the final submission before posting.
6. Everyone should take an equal part in the discussions, and submitted comments should represent contributions from everyone. Don't just listen in.
7. Post one copy of the assignment on Moodle for the group as a whole, under one person's account. Be sure all group member's names are on the submission. Recall that Moodle will show no assignment (and therefore a late message) on other group members' link – that will be ignored by me.
8. No late exercises for credit, so it's to the group's benefit to double check that it got posted OK.
